EDUCATION

Concordia University

Bachelor of Engineering in Electrical Engineering (Co-op)

Montreal, QC

Expected: May 2029

College Lionel-Groulx

DEC in Computer Science, Pre-University Program

Sainte-Therese, QC

May 2025

PROJECTS

Mini Wind Energy System | Arduino C++, ADC, Serial Logging, Voltage Regulation

Apr 2026 – Present

- Developed Arduino C++ firmware to read analog voltage signals from a wind-driven generator setup and calculate voltage, current, and power output.
- Integrating rectification, voltage regulation, and load testing to stabilize and evaluate generated electrical output.
- Logging measurement data to Python/Excel for plotting, analysis, and validation across multiple load conditions.

Electrical Engineering Lab Work | LTSpice, Circuit Analysis, Measurements

Jan 2026 – May 2026

- Built, tested, and simulated 4+ circuits involving op-amps, filters, AC analysis, and transient response.
- Validated theoretical and simulated results using electrical measurements, KCL/KVL, phasors, and frequency response analysis.
- Used oscilloscopes, function generators, and multimeters to observe and analyze real circuit behavior in laboratory settings.

Dream Game RPG | C#, Unity, Inverse Kinematics, Real-Time Motion Control

Jan 2025 – Apr 2025

- Implemented a vector-based inverse kinematics system in C# using joint positions, direction vectors, and distance constraints.
- Applied robotics-style kinematics to translate target positions into coordinated procedural limb movement.
- Developed real-time motion logic involving animation timing, collision detection, and system updates.

Steal Character! | Lua, Client-Server Logic, Multiplayer Systems

May 2025 – Aug 2025

- Collaborated with a **team of 2** to develop a multiplayer Roblox game that reached **300K+ visits**, maintained a **95% like ratio**, and ranked among the **top 10,000 Roblox experiences** by monthly active users.
- Implemented client-server gameplay logic to handle player actions, server-side validation, and synchronized multiplayer interactions.
- Developed anti-cheat logic to detect invalid player behavior and enforce gameplay rules through server-side validation.

EXPERIENCE

Sales Associate

Ecko Unltd

Aug 2022 – Jan 2023

Rosemere, QC

- Handled customer service, transactions, and sales support in a fast-paced retail environment serving dozens of customers per shift.

Assistant Manager

102 Resto Bellevue

May 2025 – Oct 2026

Sainte-Anne-De-Bellevue, QC

- Supported restaurant operations through workflow coordination, inventory tracking, sales monitoring, and service efficiency improvements.

TECHNICAL SKILLS

Programming: C++, C#, Python, MATLAB, Maple, Java, Lua, JavaScript, SQL, HTML/CSS, Git, OOP

Embedded/Hardware: Arduino, ADC, Analog Input, Serial Logging, Data Acquisition, Voltage Regulation, Electrical Measurements

Electrical: Circuit Analysis, KCL/KVL, Thevenin/Norton, AC Circuits, Phasors, Op-Amps, Digital Logic

Tools: LTSpice, Excel, Unity, Roblox Studio, Oscilloscope, Function Generator, Multimeter

Languages: English (**Fluent**), French (**Fluent**), Khmer (**Advanced - Spoken only**)
